Career Objective

Motivated Computer Science & Engineering Graduate (2024) with hands-on training in DevOps, Multi-Cloud infrastructure, and automation. Seeking an entry-level Cloud / DevOps Engineer role to leverage skills in AWS, Linux, Terraform, Docker, and CI/CD pipelines to build scalable, reliable infrastructure.

Technical Skills

- **Cloud:** AWS (EC2, S3, VPC, IAM, RDS, EKS, ECS, LAMBDA, CFT, CW, CT), Azure & GCP
- **CI/CD:** Jenkins, GitHub Actions, ArgoCD, Maven, Nexus, SonarQube
- **Containers:** Docker, Kubernetes (ECS, ECR, EKS, AKS, GKE, Helm, Kustomize)
- **IAC:** Terraform, Ansible
- **Monitoring:** Prometheus, Grafana, CloudWatch
- **Security:** Trivy, OWASP, Terrascan, SonarQube, Sentinel Policy
- **Scripting & Operating Systems:** Shell, Python, Linux(Ubuntu, Amazon Linux)
- **AI Tools:** K8sGPT, CAST AI, Terraformer

Hands-On Projects

Project 1: CI/CD Pipeline for E-commerce Application (Flipkart-like System)

Tools: Terraform, Jenkins, Ansible, Prometheus, Grafana, Git, SonarQube, AWS

- Designed and implemented an end-to-end CI/CD pipeline using Jenkins to automate application build, testing, and deployment.
- Automated AWS infrastructure provisioning using Terraform, including VPC, EC2, S3, RDS, and IAM resources.
- Automated application deployment to Apache Tomcat using Ansible playbooks.
- Integrated SonarQube for automated code quality analysis within the CI/CD pipeline.
- Configured Prometheus and Grafana for infrastructure/application monitoring, metrics visualization, and alerting.
- Secured sensitive configuration data using Ansible Vault.
- Configured Amazon S3 versioning and cross-region replication for artifact/storage management.
- Implemented AWS resource optimization using right-sizing and Auto Scaling concepts to improve infrastructure efficiency.

Project 2: Kubernetes-based Microservices Deployment

Tools: Docker, Kubernetes (EKS, Helm, ArgoCD), Terraform, Prometheus, Grafana, AWS

- Automated Amazon EKS cluster provisioning using Terraform and deployed containerized microservices on Kubernetes.
- Built and managed Docker images and pushed them to a private container registry.
- Created Helm charts to package and manage Kubernetes applications.
- Implemented GitOps-based deployments using Argo CD for automated application delivery.
- Configured Horizontal Pod Autoscaler (HPA) to automatically scale workloads based on resource utilization.
- Implemented RBAC, namespaces, and resource quotas to manage access and resource allocation.
- Configured Prometheus and Grafana for Kubernetes cluster monitoring, metrics visualization, and alerting.
- Implemented proactive monitoring and scaling practices to improve application reliability and availability.

Certifications

- AWS Cloud Quest: Cloud Practitioner - Training Badge
- Oracle Cloud Infrastructure Certified Foundations Associate

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2020 – 2024

Malla Reddy College of Engineering, Hyderabad
